## INTEGRATED MANAGEMENT SYSTEM POLICY

Etampa Metra a.s. is a medium-sized company located in the industrial zone of Blansko. It deals with the processing of small metal stampings. We create and maintain an IMSP that meets the requirements of ISO 9001, ISO 14001 and IATF 16949. The management of Etampa Metra a.s. hereby declares the strategic document POLICY OF THE INTEGRATED MANAGEMENT SYSTEM in the field of quality and environmental protection.

Our IMSP policy is based on the following principles:

1. Ensuring compliance with all customer requirements with respect to applicable legislation and generally applicable standards
2. Monitoring and evaluating the level of customer satisfaction
3. Application, development and review of the suitability of the quality management system and environmental protection
4. Ensuring that all employees of the company use their knowledge, skills and abilities and know their personal responsibility for the quality and protection of the environment when performing work activities and are aware of the obligation of confidentiality towards the customer
5. Developing the level of professional competence of employees
6. Evaluation of performance, increasing efficiency, recognition of personal approach and contribution of employees
7. Creating a working environment that positively affects the fulfillment of requirements for quality and environmental protection, including the achievement of plans announced by the company's management
8. Monitoring the functionality of processes, obtaining objective data and performing their analysis with follow-up measures
9. Analyzing the causes of adverse conditions and timely adoption of measures to improve the quality and protection of the environment
